

— VISUAL REFERENCE

chanwer Showcase.

Every palette, scale, header treatment, surface, chart form and native Typst table pattern in the chanwer R package — static output for chanwe-report-typst

PACKAGE **chanwer v2.3**

R design system

FORMAT **chanwe-report-typst**

Quarto extension

AUTHOR **Chanwe**

Alejandro Abraham

chanwe®

DOCUMENT MAP

Contents.

The complete static reference for chanwer: the brand color system and its validated palettes, the four scale jobs (categorical, ordinal, sequential, diverging), the signed system, every theme_chanwe() header treatment and surface, the chart forms, and the full native-Typst table API — all on the chanwe-report-typst tokens.

01 The Color System 06 – 08

01	The categorical eight	06
02	The signed trio	06
03	Semantic roles and family ramps	07

02 Scales 09 – 13

01	Categorical	09
02	Ordinal: one-hue ramp	10

EDITION

SHOWCASE / 2026

AUTHOR

Alejandro Abraham

STATUS

Stable · Internal

One color system and one header grammar, mapped to every chart and table: the same tokens drive eyebrows, KPI arrows, table deltas, and this document.

This showcase covers every static output in the chanwer package: palette previews, categorical / ordinal / sequential / diverging scales, the signed positive-negative system with its KPI score-board, all header treatments (eyebrow, subtitle, note, KPI, title-only, no header line, compact and spacious), all five brand surfaces plus transparent, framed variants, the chart forms (scatter, bar, line, area, distribution, error bars, heatmap, facets), and every `chanwe_kbl()` pattern — surfaces, densities, totals, highlights, vertical rules, signed deltas, title-only and header-less tables. The interactive counterparts (`gt`, `plotly`, `reactable`) live in `chanwer-showcase-html.qmd`.

1 The Color System

Every color in `chanwer` is a named token. `chanwe_palette()` returns the full inventory; `chanwe_palette("<group>")` returns one group; `chanwe_preview_palette("<group>")` draws its swatch grid.

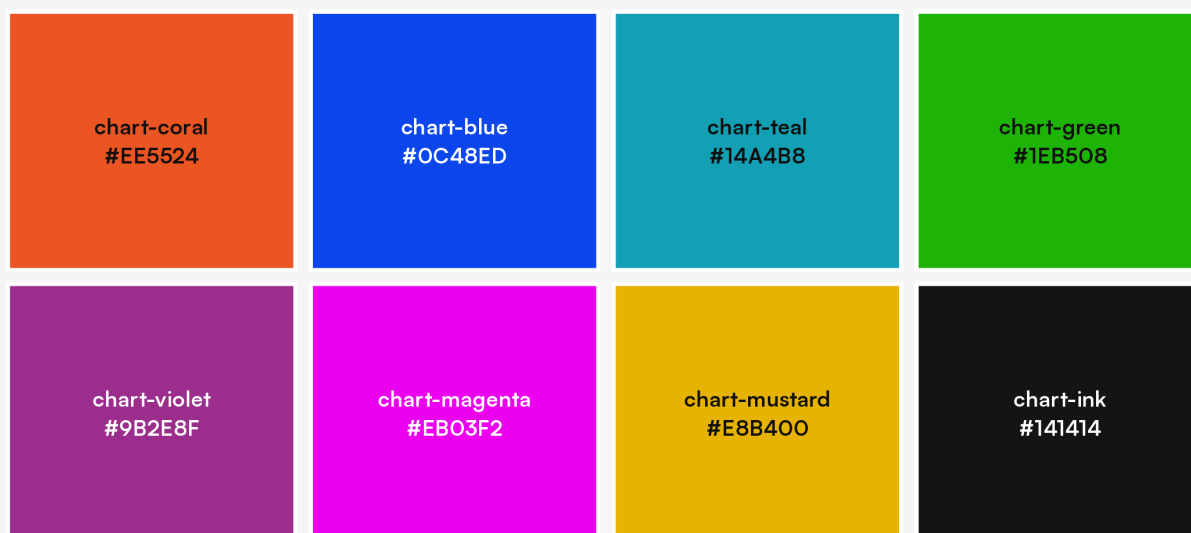

● // The manual assigns each family a job

Coral is the house lead, blue is structural, green is positive, vermillion is alert, ink is the neutral anchor. The scales below are built on those roles — positive/negative is never an arbitrary red/green pair.

1.1 The categorical eight

Fixed, CVD-validated slot order — coral, blue, teal, green, violet, magenta, mustard, ink. Mustard and ink sit last deliberately: charts with up to six series never reach them.

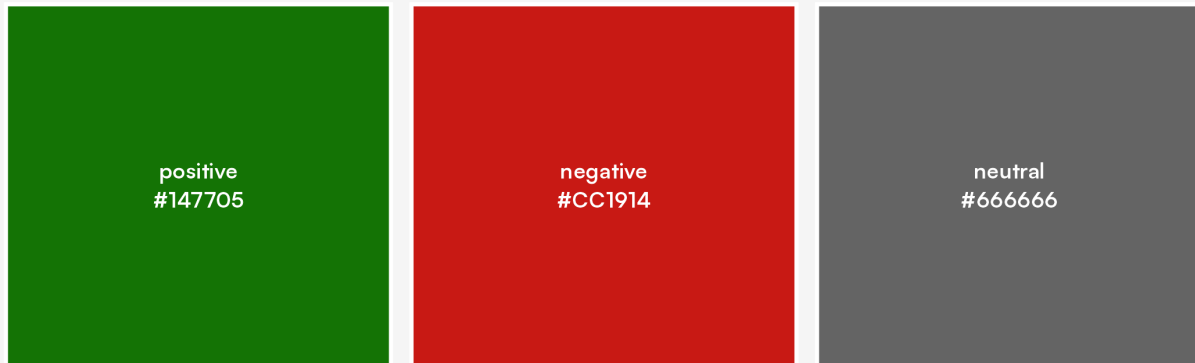

Chanwe palette • chart

1.2 The signed trio

Hue-true darkenings of the brand's positive (green), alert (vermillion) and neutral (ink) families, stepped until each passes WCAG 4.5:1 small-text contrast on all five brand surfaces.

Chanwe palette • signed

1.3 Semantic roles and family ramps

Chanwe palette • semantic

Chanwe palette • p15_teal

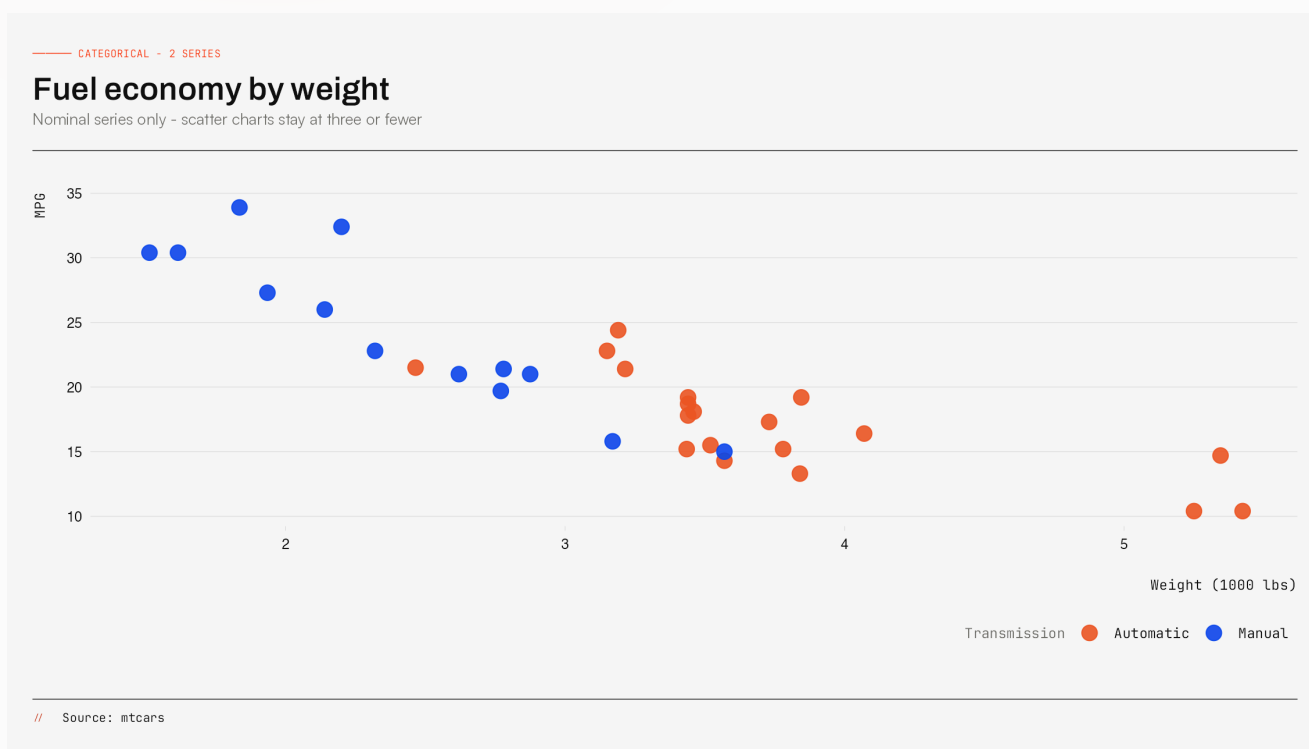

Chanwe palette · mb_orange

mb-orange-100 #F8DDD9	mb-orange-200 #F6CFC7	mb-orange-300 #F5C0B6	mb-orange-400 #F2A393
mb-orange-500 #F09482	mb-orange-600 #EF8670	mb-orange-700 #ED775F	mb-orange-800 #EC684E
mb-orange-900 #EA5A3C	mb-orange-950 #E94B2B		

2 Scales

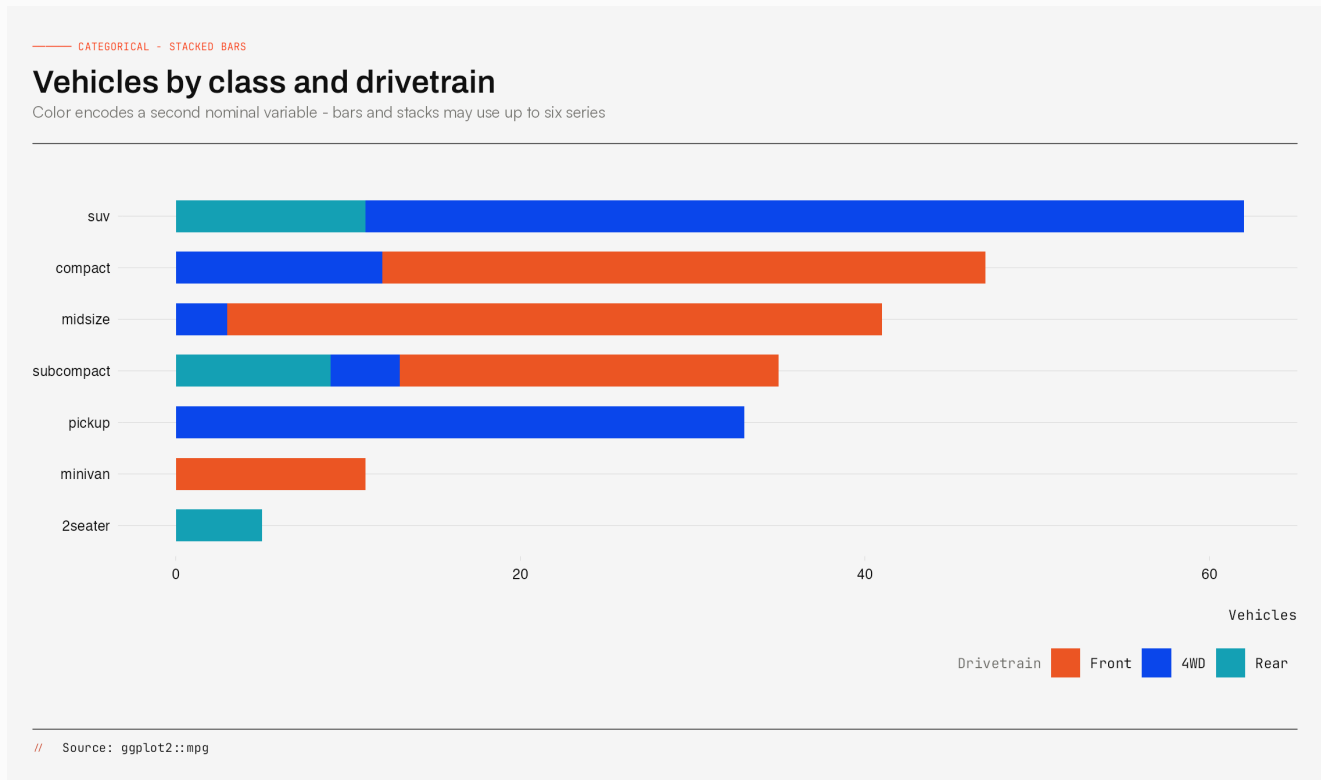

2.1 Categorical

`scale_color_chanwe_d()` / `scale_fill_chanwe_d()` assign the chart palette in slot order, recycling past eight.

● // Scatter, bubble, and maps: three series maximum

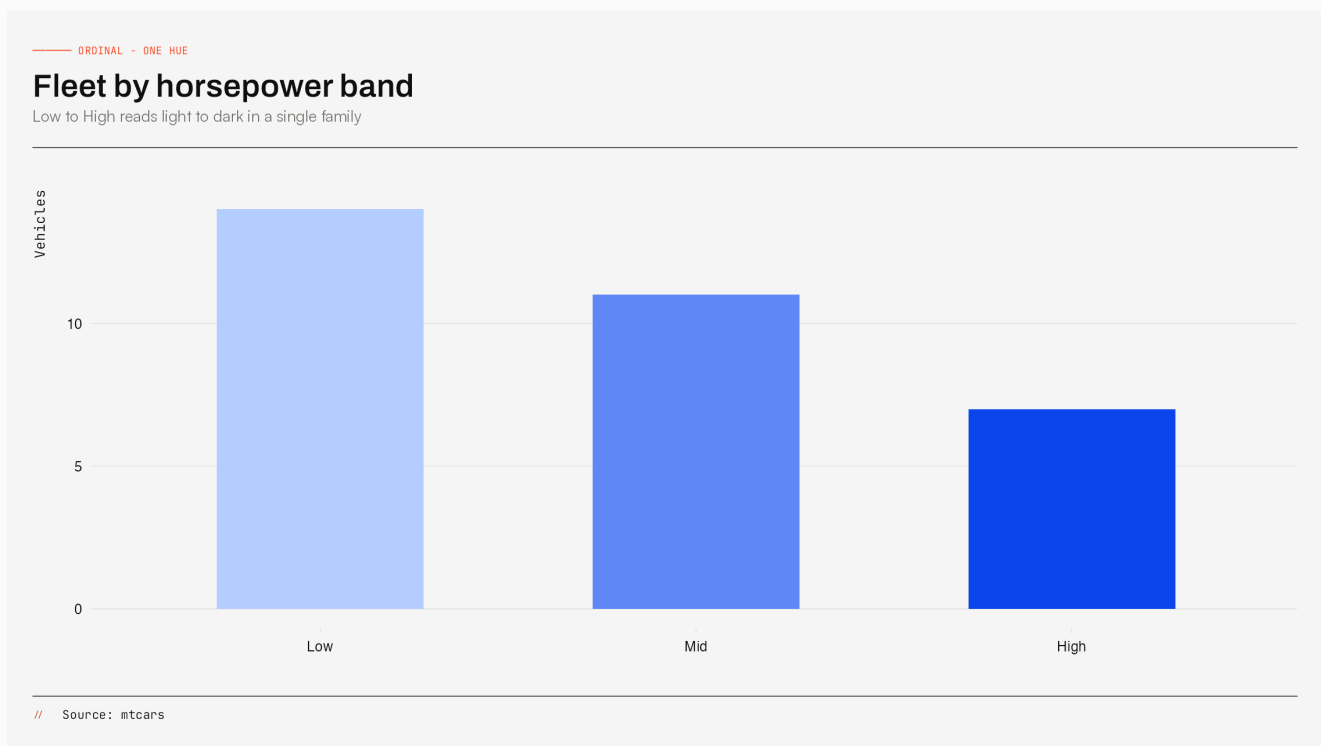

In those forms any two marks can sit side by side, so the palette must pass the stricter all-pairs check — the first three slots do. Fold extra series into “Other” or facet. Bars, lines, and stacks may use up to six.

2.2 Ordinal: one-hue ramp

When category order carries meaning, use a ramp group so the reader sees the order in the color:

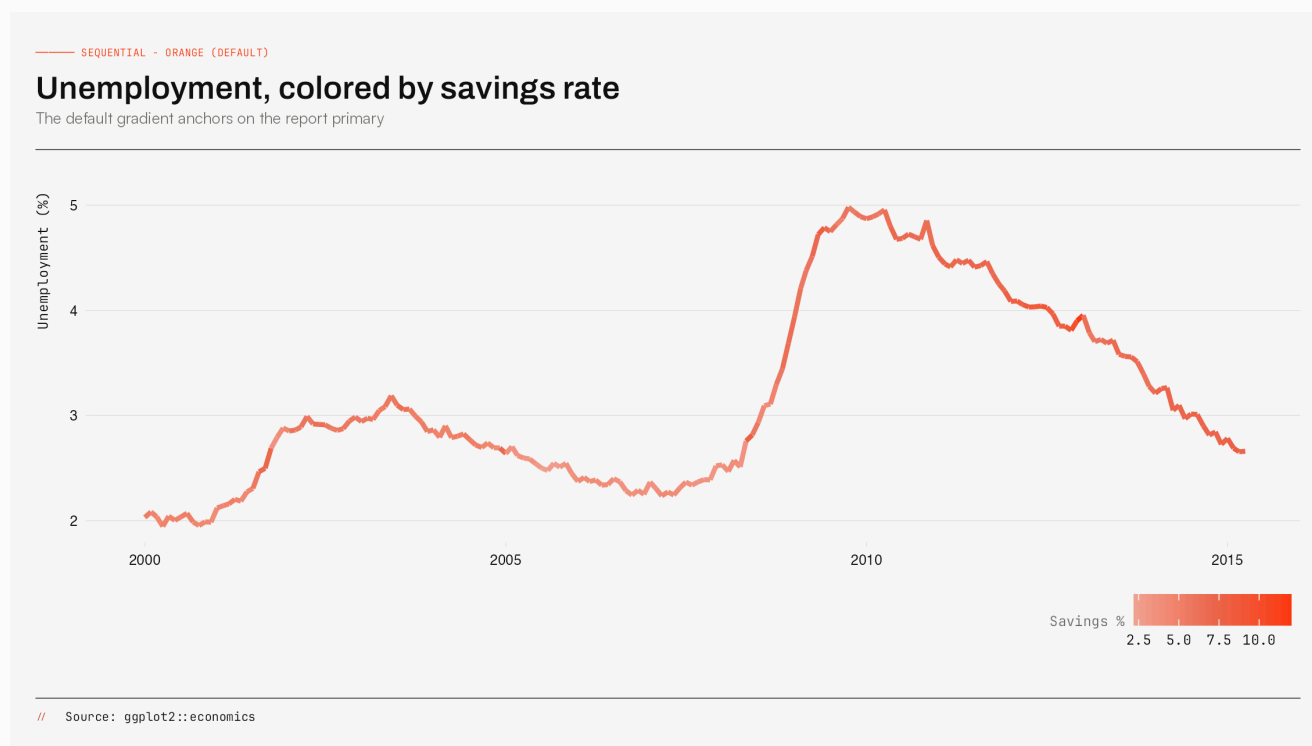

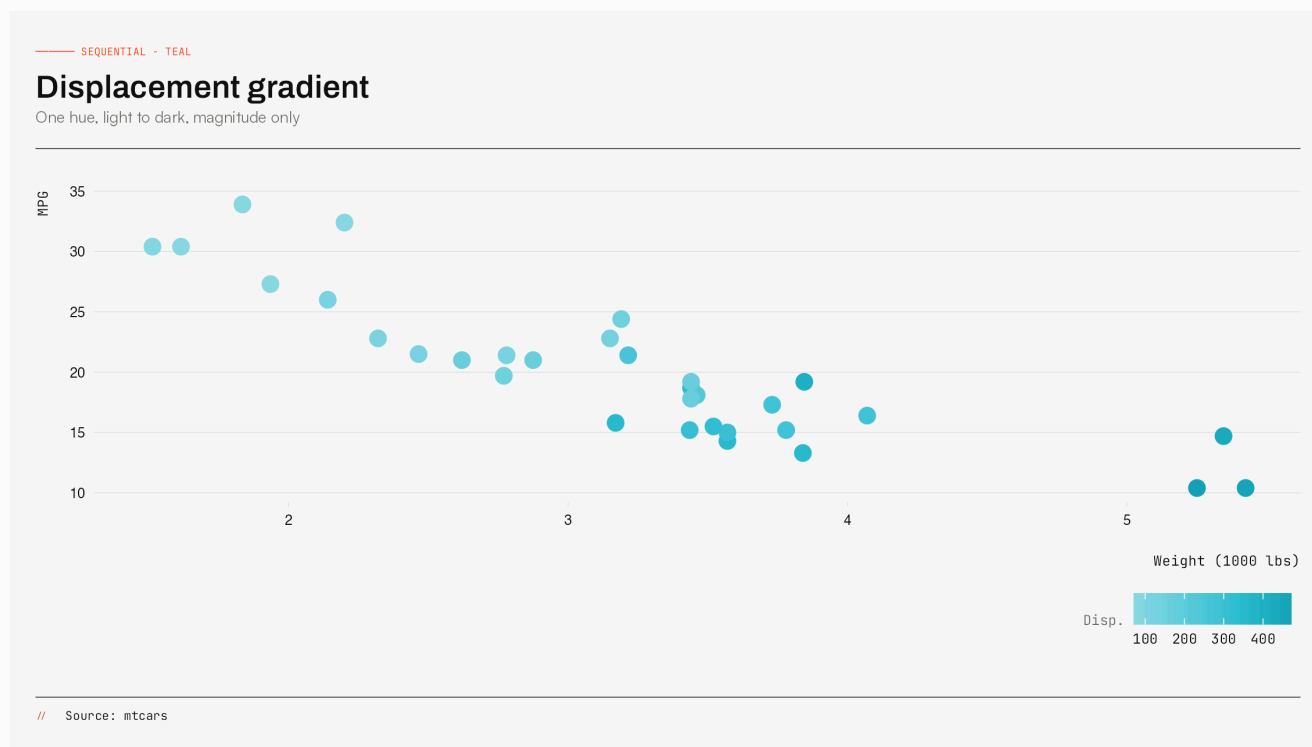

```
scale_fill_chanwe_d(palette = "p15_blue", reverse = TRUE)
```

2.3 Sequential

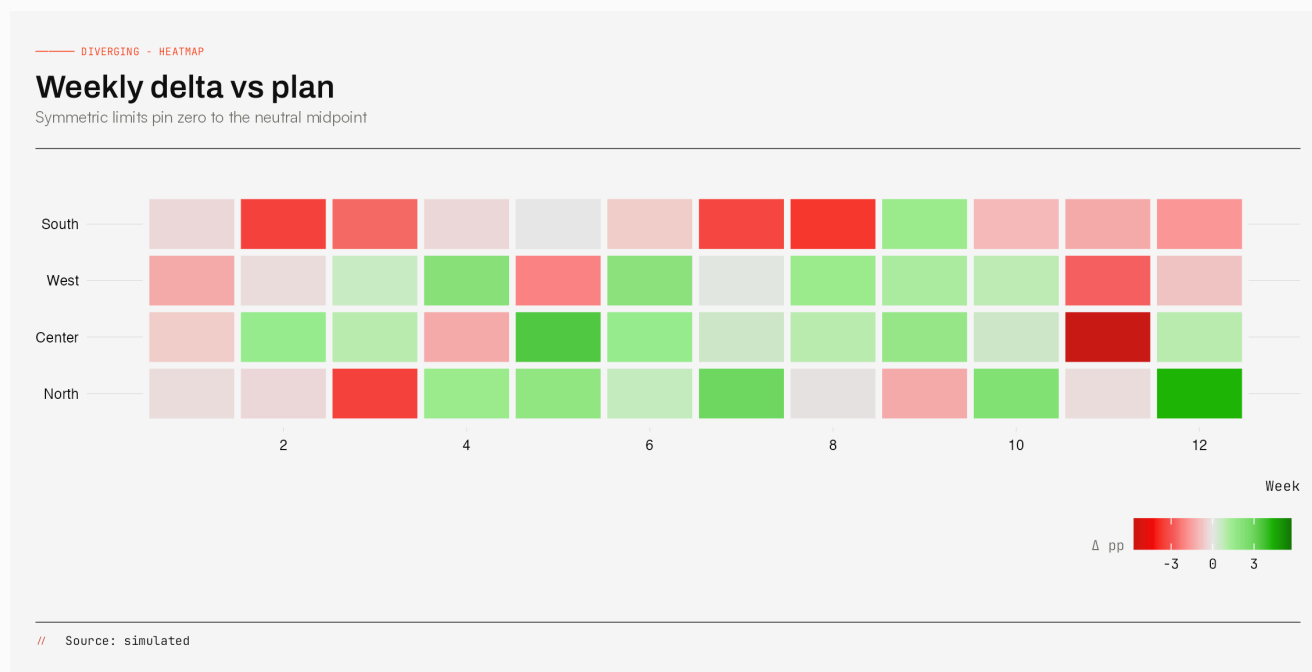

`scale_color_chanwe_c()` / `scale_fill_chanwe_c()` encode magnitude with one-hue, light-to-dark brand gradients:

`orange` (default), `coral`, `blue`, `teal`, `green`, `vermillion`, `magenta`, `violet`, `mustard`, `ink`.

2.4 Diverging

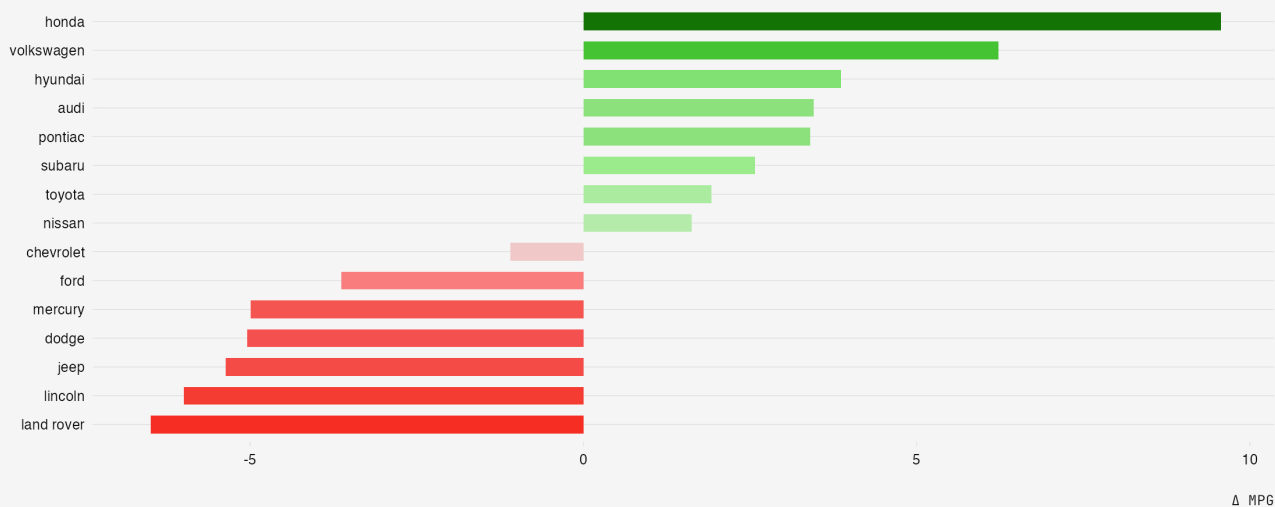

`scale_fill_chanwe_div()` encodes polarity — vermillion through a neutral midpoint to green, signed tokens at the poles. Give it symmetric limits so zero lands on the midpoint.

// DIVERGING - BARS

Highway MPG vs fleet average

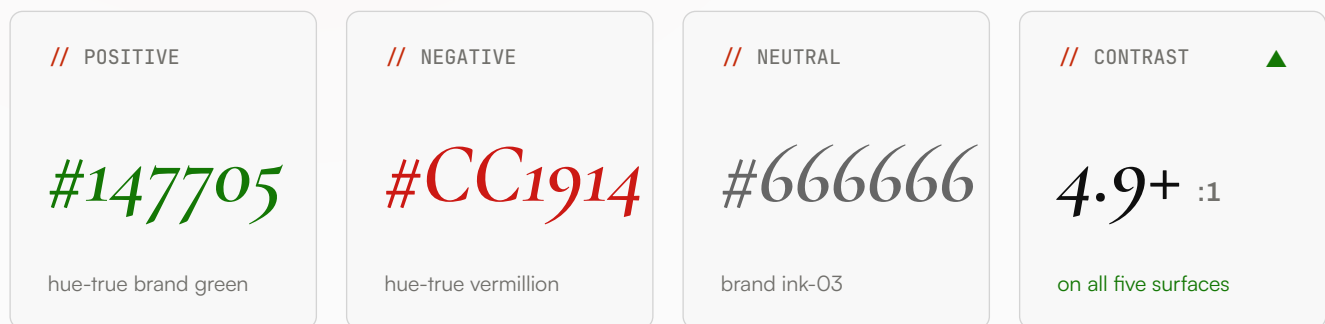

Above average in green, below in vermillion

// Source: ggplot2::mpg

3 The Signed System

One pair everywhere: `chanwe_palette("signed")` drives the KPI arrows, table deltas and the diverging poles. `direction` states the movement (▲/▼); `valence` states whether that movement is good news and drives the color.

3.1 KPI scoreboard with valence

3.2 Signed deltas in tables

`chanwe_col_signed()` colors by the column's *raw* values; `flip` marks the smaller-is-better rows so color reads as valence, not sign.

SIGNED - TABLES

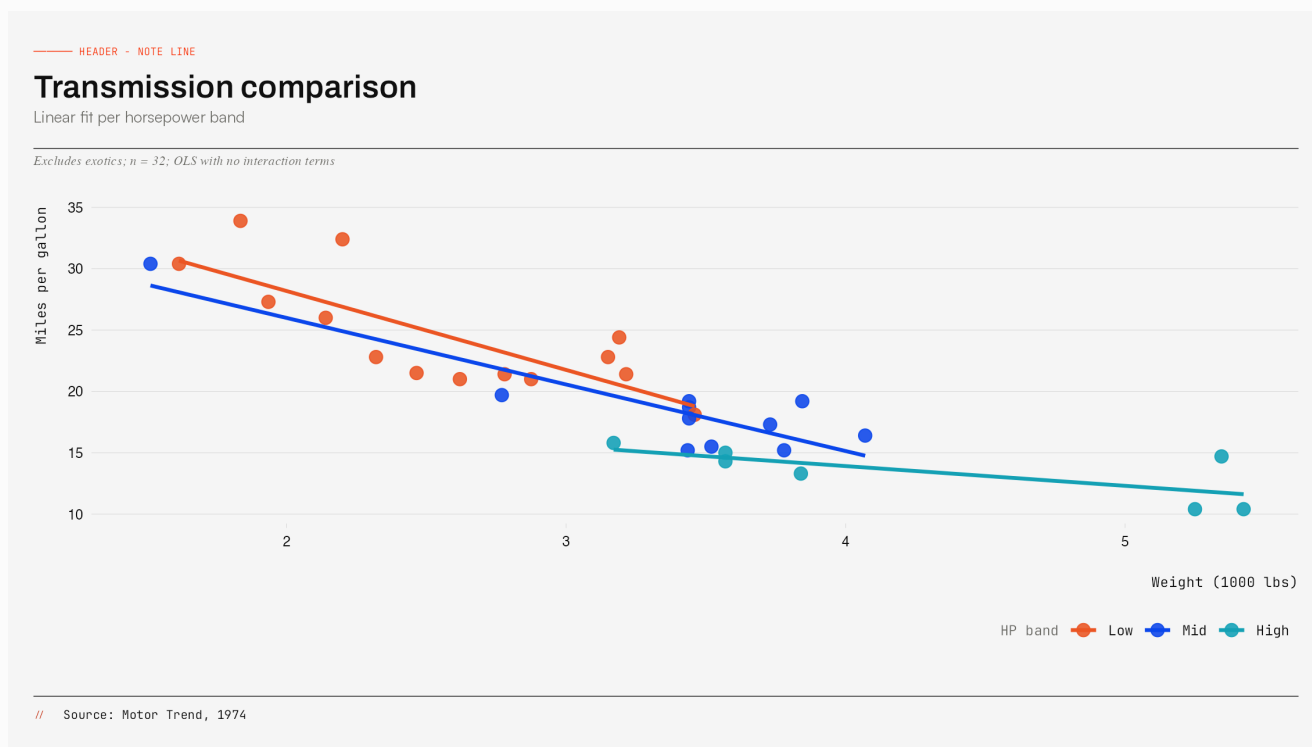

Quarterly performance

Signed deltas via `chanwe_col_signed()` - flip marks Opex and Churn so color reads as valence

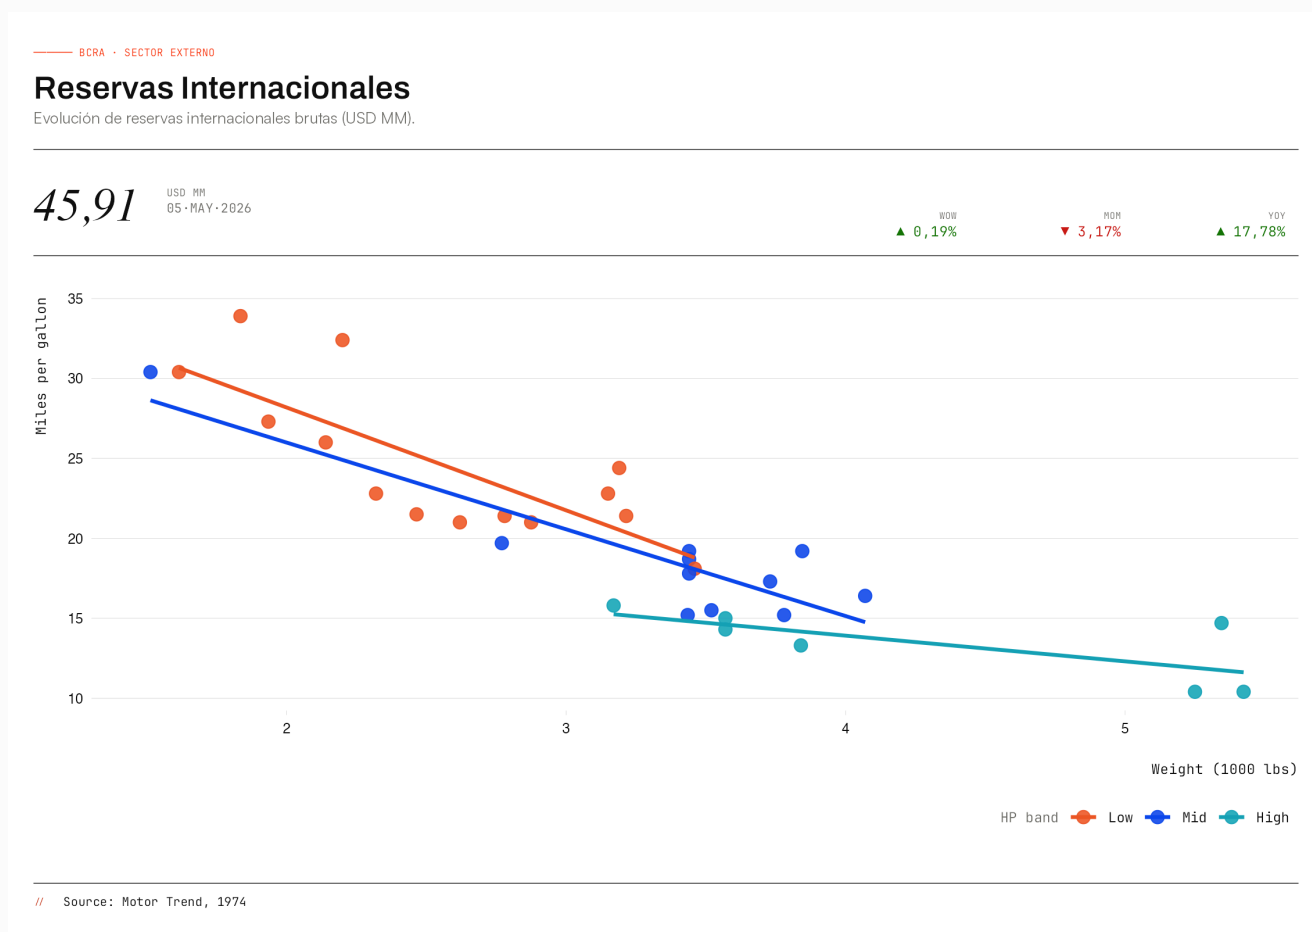

METRIC	USD K	QOQ	YOY
Revenue	1,240.5	+12.4%	+28.1%
Gross margin	682.1	+4.2%	+9.6%
EBITDA	310.2	-3.1%	+11.2%
Opex	-420.3	-1.9%	+6.3%
Net income	185.7	+5.8%	-2.4%
Churn	42.0	-0.8%	-4.1%
